How To Scan Your Documents Using Fast Scanner

I know how hard it is to get a scanned copy of documents if you do not have 3 in 1 printer at home.

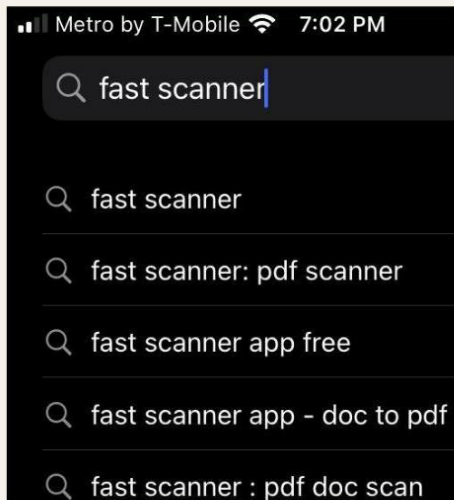

What is Scanner?

According to an online oxford dictionary, it is a device that scans documents and converts them into digital data.

The good thing is...since technologies evolved and changed from time to time, knowledge and skills expand too. This is why we should take advantage of its every benefit to advance and expand our horizons. Do you have a phone with you? Do you know how to install the app on your phone? If yes, any kind of phone now is capable of downloading, installing, saving, capturing, and emailing things you wanted to have and many more! Yes, you heard it right! To make it easier for us to transfer documents from one place to another, you may want to try the FAST SCANNER! How to do that? Just stay with me and I will teach you a step-by-step guide on how to scan your documents using Fast Scanner on your phone.

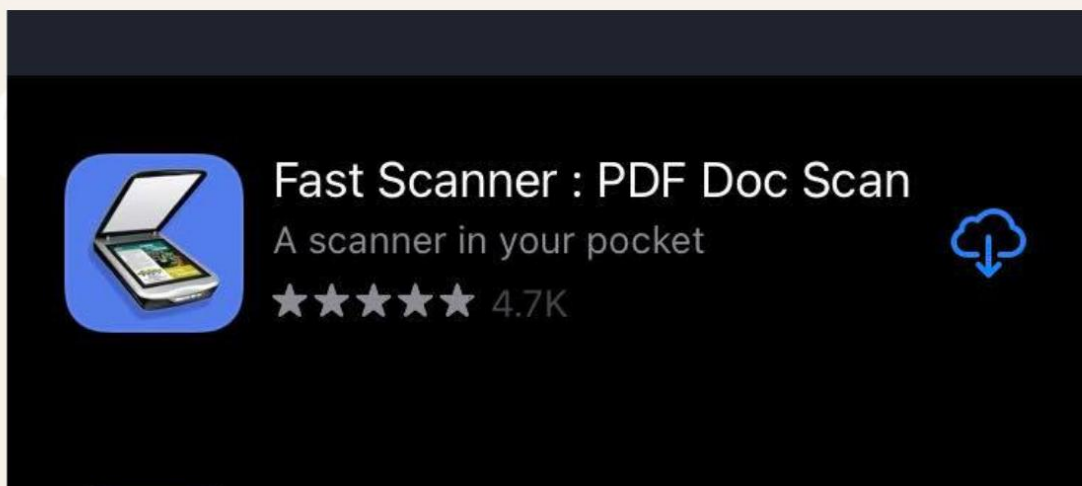

Step 1. Go to your google play store/app store

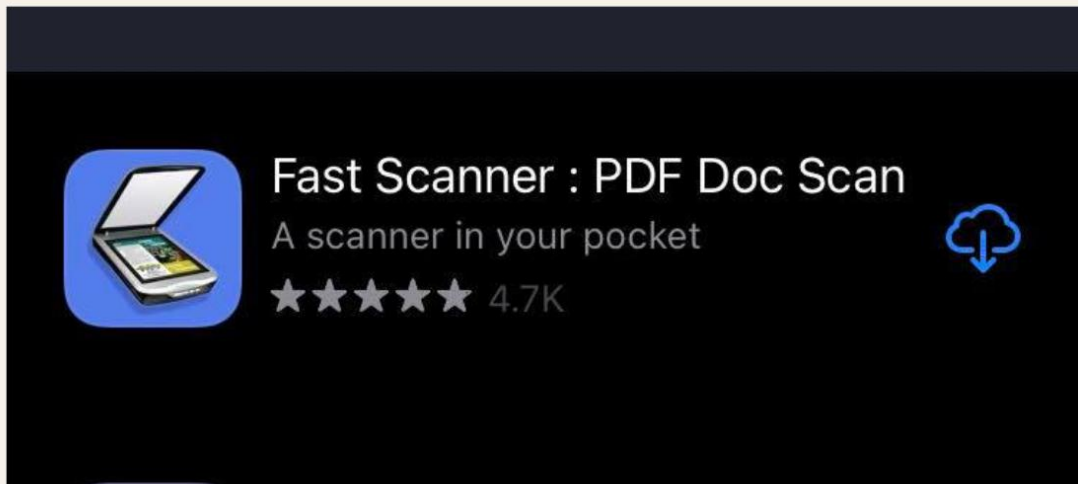

Type Fast Scanner on the search bar and wait till the choices appear.

Once the choices appeared, click the fast scanner (the first one on the choices)

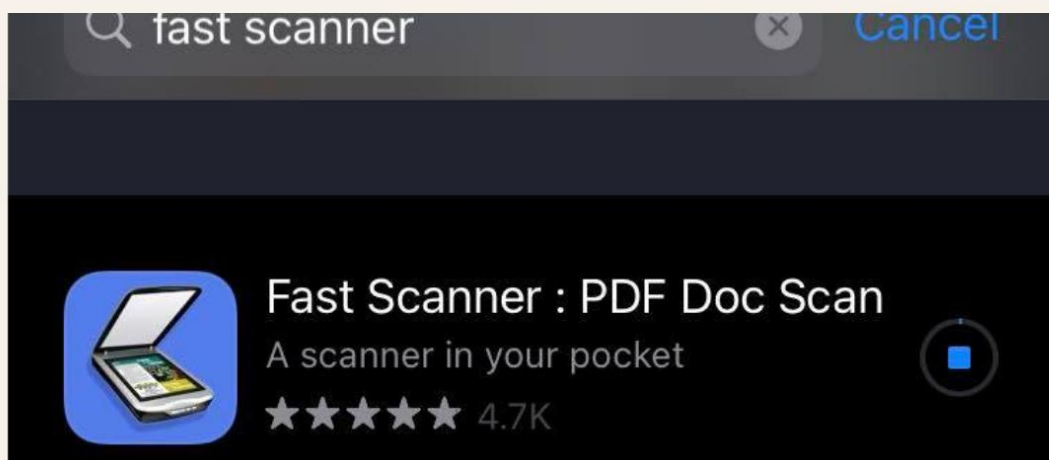

Scroll down and look for the fast scanner same picture as below.

Step 2. Click the arrow down to install.

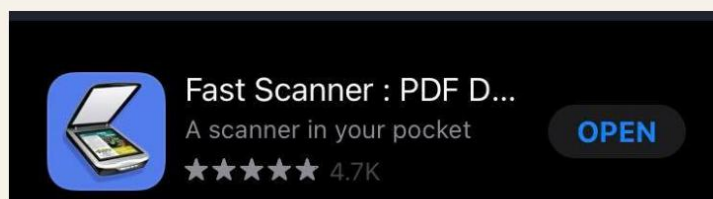

After clicking the arrow, the circle will appear to show the status of the installation.

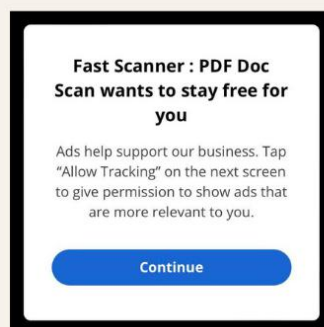

Wait for the circle to appear as full. Make sure that you have enough space on your phone and good internet otherwise, it will interrupt the installation process. If that happens, clear up some spaces on your phone by deleting some apps that you do not need and go back to do the same procedures above.

Step 3. Click OPEN to prepare for scanning.

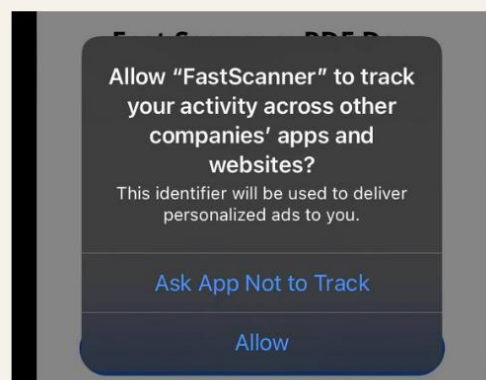

Click open and wait for a moment.

Click Continue

Click Allow to give permission and proceed to the next step.

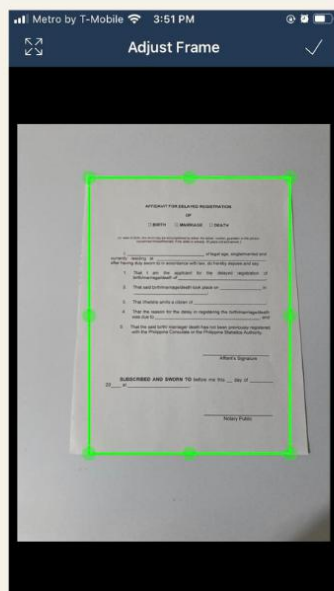

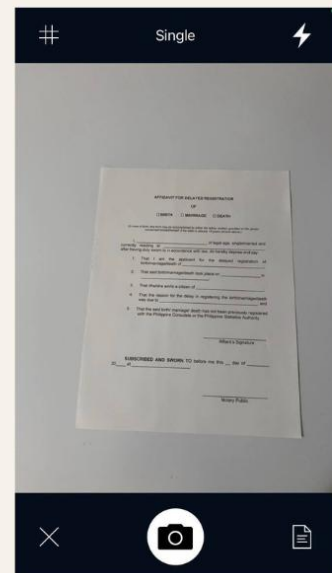

Step 4. Ready your camera to capture your desired document/s.

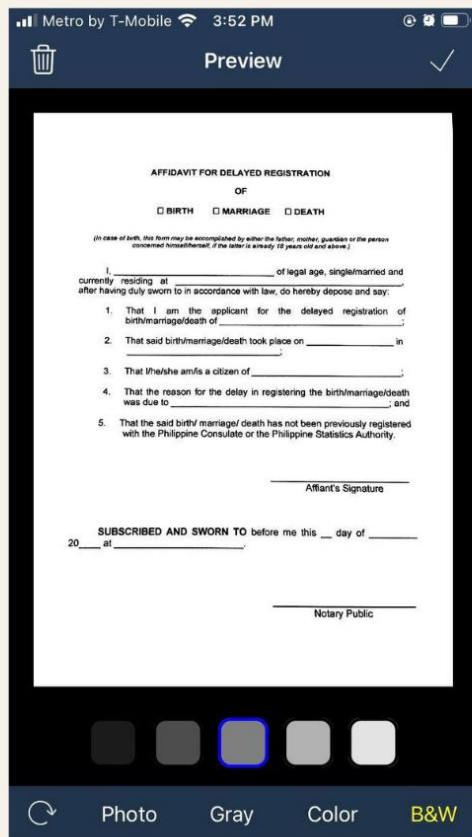

When the camera is already set up, try to get any piece of paper with something written on it that you can use for trial before proceeding to your original documents.

Put the paper on a clean table and click the camera button below.

Move the cropping lines with your fingers to capture only the content you would like and make it more appealing then click the check ✓ symbol at the upper right corner to finalize the captured picture.

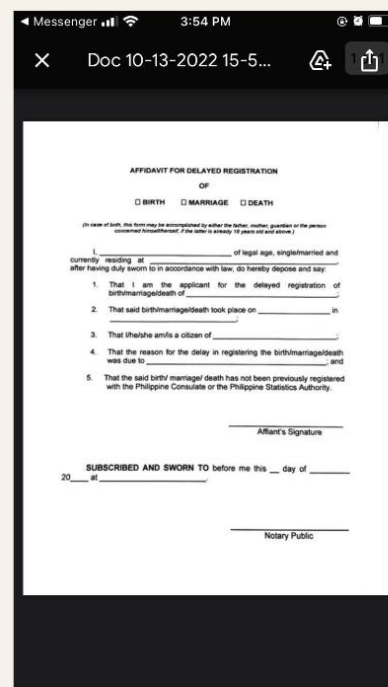

Step 5. Choose the appearance of your document/s.

You may also want to change the appearance of your document/s, to do that, click the four squares below and see how would you like your document to be appeared.

After that, click the  symbol at the upper right of your phone for the second time to finalize your document/s.

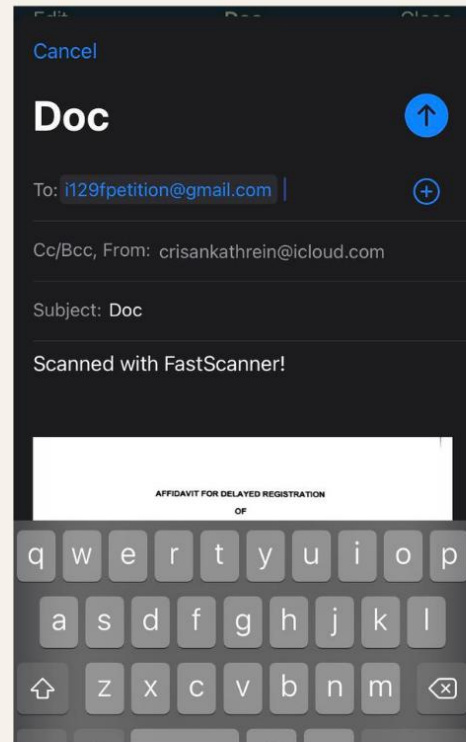

If you are already satisfied with the result, you may now send your document/s to your email or others' email by clicking the send symbol at the upper right.

Step 6. Type the email address of the recipient.

Type the correct email address of your recipient in the "To:" section. If you want to add more recipients, press space then start typing a new email address. Put a name on the "Subject:" to easily see your email.

Once you are done, click the arrow up on top to send the document/s.

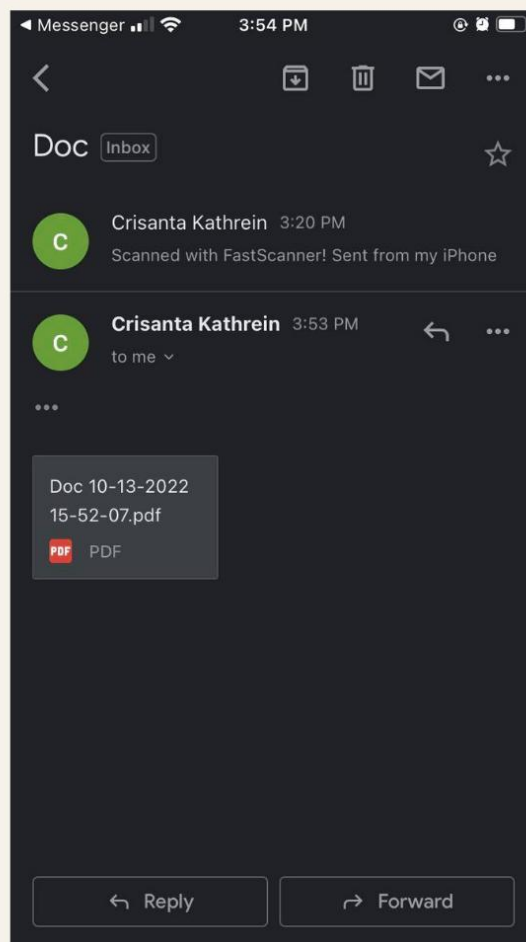

Step 7. Check your email(if you sent it your email), if not, check your sent items.

To make sure that you have received the document/s, go to your inbox/spam and find the email.

Step 8. Open the email.

Click your inbox/spam to find the new email with your subject then click it to open. You will see the attached file below.

Step 9. Download

Open the attached file to download it. You may also print it or share it with others through messenger and others. And you are good!
